

# Luxury vinyl is perfect for busy lives

**Luxury vinyl is the fastest growing flooring category on the market.** This product is designed to replicate the timeless look of ceramic, natural stone, or wood - but at the same time is a very durable and comfortable surface for everyday living. Luxury vinyl flooring is available in a beautiful collection of colours and designs from traditional to modern to country. It is thicker than traditional sheet vinyl (linoleum). New 3D and 4D printing technology is so advanced that manufacturers can offer very real visuals for wood, ceramic, or stone, at a lower cost.

**Luxury vinyl tile can be installed with or without grout for a convincing stone or ceramic look.** Tile sizes range. You can even choose a "mixed kit" which provides tiles in 3 different size formats and creates a beautiful sophisticated floor design.

**Luxury vinyl plank replicates the look of hardwood and is available in a multitude of plank lengths and widths, featuring bevelled edges and ends.** With today's technology, these planks re-create the subtle textures found in wood grains making them look like the real thing.

**Luxury vinyl is water resistant making it the ideal choice for kitchens, bathrooms, mud-rooms, or laundry rooms.** A great choice for busy households with kids and pets or if you are looking for a low maintenance, high performing flooring option that looks beautiful.
